Summary

Full-stack web developer with a web development certificate from University of Oregon. Extensive background in event production and service industry management provide strong teamwork and communication skills. Ability to design, build and implement project ideas from inception to deployment. Passionate about user experience, accessibility, security, and Web3. Demonstrates leadership, empathy, critical thinking, and adaptability.

Skills

Frontend: HTML5, CSS3, React, jQuery, Bootstrap, Tailwind, Handlebars, Figma

Backend: Node, Express, MySQL, Sequelize, MongoDB, Mongoose, GraphQL, REST API's, Apollo

Development: Python, Javascript, Git, Heroku, PWA, ORM, OOP, Agile, Algorithms, Testing

Projects

The Alpha | MERN, Javascript, GraphQL, Apollo, Heroku, Queries, TypeDefs/Mutations/Resolvers

Repository: [shorturl.at/mqtxz](https://github.com/shorturl.at/mqtxz) | Deployed: shorturl.at/hk1x3

A scraper for NFT data launching on Magic Eden Marketplace

- Extracts and displays important NFT data on an easy to read card which logged in users can save and delete from their dashboard.
- Demonstrated understanding of API calls, user web tokens and encryption, how to query and structure typeDefs/resolvers/mutations in GraphQL, and connection to the front-end.

PokeBuilder V2 | HTML, Tailwind, Sequelize, Node.js, Handlebars

Repository: [shorturl.at/bKT19](https://github.com/shorturl.at/bKT19) | Deployed: shorturl.at/HJLV3

Full-stack application to search through Pokemon monsters by name or number

- User log in capability allows them to save Pokemon to their Pokebelt and view on their profile.
- Styled and designed layout using Tailwind CSS and Handlebars, structured User and Pokemon data for SQL, implemented a RESTful API and CRUD operations.

Deep Thoughts | MERN, GraphQL, Apollo, Faker, Mongoose, JWT, Heroku

Repository: [shorturl.at/kryKL](https://github.com/shorturl.at/kryKL) | Deployed: shorturl.at/hjk24

Single page MERN social-media application for posting thoughts, reactions, and adding friends

- Built API endpoints, queries and mutations to fetch and modify server-side data with GraphQL.
- Implemented authentication functionality using JSON web tokens which updates user-contextualized data on the page.

Tech Blog | Node, Express, Handlebars, HTML, CSS, Javascript, SQL, Sequelize

Repository: [shorturl.at/cINQV](https://github.com/shorturl.at/cINQV) | Deployed: shorturl.at/wy045

A CMS- style blog site for tech news and culture, using MVC structure and RESTful API.

- Users can sign-up/login to create posts, make comments, and upvote others.
- Certain features are not available or pages redirect unless a user is logged in.

Education

Full-Stack Web Developer Certificate	University of Oregon (Remote)	July 2022
UX/UI Foundations	DesignLabs (Remote)	September 2020
EMT Certification	Lane Community College - Eugene, OR	May 2018

Experience

Owner / Bookkeeper / Performer	2012-Present
Proper Sound LLC	Portland, OR

A music, art and experience collective focused on producing small to large events with exceptional sound and meticulously curated artists.

- Grew from small, free events into ticketed, profit generating shows - now booking artists across the US.

Manager	2021-2022
Luckey's Club	Eugene, OR

Responsible for hiring, training and scheduling staff, making orders, working with the public and handling security issues.

- Implemented a training and daily routine manual for current and future employees.
- Upgraded security and customer experience, handled music bookings and navigated COVID mandates to comply with state regulations.

Bartender / Server	2018-2022
Viking Braggot Company	Eugene, OR

Helped with construction and opening of a new restaurant for the brewery company, as well as starting their catering service. Responsible for customer satisfaction, money handling and making orders on a daily basis.

- Provided food and full bar catering for the 2022 World Track & Field Championships for Asics.
